Mit Kompetenz zum Detail.

DID YOU KNOW THAT PRODUCTS FROM THESE FIRMS WERE DESIGNED AND PRODUCED IN DRESDEN?

SIEMENS

 **BOSCH**

bluechip

PHILIPS

ADURAN[®]

IBM

Under our brand name CoolDesign we offer services that help support your company at the development and product launch stage. Our employees have many years of experience in the development of metal and plastic mechanical components and can, if required, also help you define specifications. In particular, we have vast experience in the field of product optimisation. For example, our employees managed to reduce the material costs in an IBM storage cabinet by 30% without any loss of functionality. We have also acquired extensive experience in combining parts and functions. We

frequently team up with our international customers to conduct projects to improve product costs. Our comprehensive network in Europe and Asia means we can seek and qualify suppliers that match your requirements. At the same time we never lose focus of the future product price. From the very beginning of every project our certified process sequences ensure that all processes remain transparent. Integrated prototype construction at CoolCase enables us to implement our joint ideas swiftly. Please send us your enquiries and challenge us!

Systems / Tools

- CAD-systems: Creo/ProE and Solidworks with Logopress
- PDM/PLM - integration in SAP
- AD-systems: Creo/ Import of data from all standard CAD systems (e.g. Catia, Inventor)
- Export in standard exchange file formats (e.g. step, dwg)
- 3D coordinate measuring machine

Competences / Qualifications

- Many years of broad experience in the development of housings and devices in the electronic sector (from industrial to consumer appliances)
- Qualified engineers and technicians
- Our own technical solutions for price-optimised connection technologies
- Our own patents to protect against heat build-ups in electronic environments
- CE, TÜV and IP certifications of products
- ISO 9001 certification
- In-house prototyping
